Fee inclusions: Lunch, snacks and free-flowing coffee

Introduction

The OPITO-approved UK BOSIET (Basic Offshore Safety Induction and Emergency Training) with Compressed Air Breathing System (CA-EBS) course provides the delegate with a range of knowledge and skills relevant to travelling offshore by helicopter and working offshore, including safety induction, fire safety and basic firefighting; first aid; using a CAEBS

Target Group

This training programme is designed to meet the initial offshore safety and emergency response training requirements for personnel new (or returning) to the offshore oil and gas industry who will be supplied with a compressed air emergency breathing system (CA-EBS) during offshore helicopter travel.

Course Overview

The aim of the UK BOSIET (with CA-EBS) is to introduce delegates to the specific safety issues and regimes relevant to offshore installations, and to equip them with the basic emergency response knowledge and skills for travelling to and from offshore installations by helicopter.

Learning Modules:

- ◆ Safety Induction
- ◆ Helicopter Underwater Safety Training including Emergency Breathing System
- ◆ Sea Survival
- ◆ Fire Fighting and Self-Rescue

**The theory element of the course can be accessed online (instead of going to the center to take classroom session). You will only have to attend 1 day practical at the training center.*
