### Introduction

Just about every operator worldwide insists that everyone travelling to one of their offshore assets (production platform, drill rig, FPSO etc) must complete an offshore survival course before being allowed to travel.

### Target Group

This program is designed for personnel travelling to an offshore oil and gas installation by helicopter (in a cold water environment) when issued an Emergency Breathing System (EBS).

### Course Overview

Delegates attending this training and assessment program will be given the series of explanation and demonstration which will identify what they are expected to know and do.

### Learning Modules:

- ❖ Safety Induction
- ❖ Helicopter Underwater Safety Training including Emergency Breathing System
- ❖ Sea Survival
- ❖ Self-Rescue and Fire Fighting

*\*The theory element of the course can be accessed online (instead of going to the center to take classroom session). You will only have to attend 1 day practical at the training center.*
